

Artwork Requirements for labels

The following programme types can be processed:

- PC (Windows): Freehand, Adobe Creativ Suite CS4 (Illustrator, Photoshop and Indesign)

Data should be submitted in the following formats:

- Fonts: Postscript or vectored fonts
- Pictures: Open .tif files
- Logos and files: Open .eps files

Data transfer:

- Data carriers: CD ROM or FTP Server

Attention:

- As a safety measure, always send a print-out of the motif!
- Special colours should be clearly defined (e.g. Pantone, HKS or RAL)!
- Include all pictures, logos and fonts!

The following points must also be taken into consideration:

- Coverage 1-3%
- The screen angle should be for cyan 22,5°, black 52,5°, magenta 82,5°, yellow 7,5° oder cyan 15°, black 45°, magenta 75° and yellow 90°.
- Screen: Max. 60 L/cm (depending on the material chosen for printing).
- Overfilling of the individual colours: Max. 0,2 mm.
- Trimming edge: At least 1,25 mm.
- Chromatic colours: Under black or other masking colours, do not reserve space for subsequent filling out.

Indicate Pantone (real colours) with the word „Pantone“ followed by the appropriate Pantone number and the letters CV in the file. Some programmes do not recognise other wording.
